

User Guide

PB (Protect BESUT)

A 2D survival action role-playing game by Qayyim, Farhan and Ayiz. Play as Adam, protect the village of BESUT and rescue his missing friends, Arjun and Mei Ling.

Getting started

1. Begin a journey. Open the game and select **Start Game**. Follow the character screen to begin Adam's story. Arjun and Mei Ling become village defenders after their rescues.

2. Follow the opening guidance. Read the current objective and explore the village. Select an active mission in **OBJECTIVES** or **Missions** to display a direction arrow and ground route.

3. Prepare before travelling. Learn the controls, obtain supplies and organise village defences. The portal and sea routes lead to separate rescue missions; both friends must return before the final departure.

> ### Continuing an existing journey
>
> Select **Continue Journey** on the title screen. Starting a new journey replaces the existing save after confirmation.

06 Completion, settings and help

Controls and navigation

Action	Touch controls
Move	Drag the joystick in the direction you want to travel.
Sprint	Hold Sprint when available.
Basic attack	Tap Attack.
Interact	Tap a nearby object or character, or use the action shown on the contextual button.
Open inventory	Tap Pack.
Use a health potion	Tap the health-potion control when a potion is available.
Build settlement	Open Menu and tap Build settlement.
Collect sea rubbish	Move close to the rubbish and tap Pick Up.
Choose a pet-battle action	Tap Attack, Shield or Special.

On land, the **Sprint** button changes to actions such as **Talk**, **Enter** or **Exit** when you approach an interactive object or open a panel. Check the button label before tapping.

Reading the screen

Gold and diamonds: shown at the top left for purchases and upgrades.
Minimap: shown at the top right; tap it to open the world map.
Health, stamina and experience: displayed above the player or companion.
Clock: shown near the bottom centre; use it to plan for nightfall.

Open **Menu > BESUT Field Guide** for information about people, monsters and the story. To restore guidance, tap **Menu > Show current mission tips**. Tap an active mission to display its navigation route; tap it again to cancel the route.

Protecting BESUT

Keep the forest and settlement safe while gathering the resources needed for both rescue missions. Use daylight to prepare, and respond to attackers before they spread through the village.

The day and night cycle

Day and night each last three minutes. Fire monsters and sea urchins arrive at night. Surviving enemies remain active after dawn, so daylight does not remove an existing threat.

Combat and recovery

Stay within weapon range, tap **Attack** and move away from marked attacks. Sprint consumes stamina; allow it to recover between bursts. Keep health potions available and tap the **health-potion control** when needed. Ordinary defeat returns Adam to recovery and discards unbanked expedition loot.

Workers and settlement upgrades

Specialist	Role
Water Keeper	Extinguishes burning trees and restores their health.
Tree Planter	Replants fallen trees. New saplings mature in 30 seconds.
Builder	Repairs damaged structures during daylight.
Swordsman	Helps defend the village against sea urchins.

Hire workers with **Gold**. House upgrades use **diamonds** and improve the settlement's capacity and defences. The **Equipment Shop** sells rooftop guns for intact houses. Rescued friends and recruited pets also help defend BESUT.

Protect the forest

Defeating a fire monster does not extinguish a burning tree. Keep Water Keepers available and replace fallen trees. Losing every tree ends the journey and deletes its save.

Menu behaviour: ordinary village menus and conversations leave the simulation running. Clear nearby threats before browsing shops, inventory or settings.

The Dimension Portal

Opening the road

1. Follow the objective to the **northern clearing** and examine the fallen waystone.
2. Visit **Pak Rahim at the dock** and complete his conversation to receive the free portal key.
3. Return to the waystone and interact to awaken the Dimension Portal.
4. After the reveal, interact with the portal again to enter **Twilight Wilds**.

Speak to Pak Rahim after discovering the waystone. Opening the portal does not automatically begin an expedition; enter when ready.

Exploring Twilight Wilds

Follow the stone road towards the Broken Watchpost and Chaos Citadel. The watchpost winch opens a shortcut. Rest at the citadel lantern to heal and establish a safe checkpoint. Read enemy warnings, move out of marked areas and counter during recovery.

Recruiting wild companions

Approach **Bramble Cat** or **Dusk Moth** and interact to begin a pet challenge. Choose **Attack**, **Shield** or **Special**; the rival responds after your choice. Take as much time as needed to choose an action. The surrounding world waits until the challenge is closed.

A first victory recruits the pet and grants its reward. Repeated friendly challenges do not repeat the reward. Losing or leaving a challenge is peaceful, and an earned bond survives a later expedition defeat.

Rescuing Mei Ling

Cross the citadel's inner arch to engage **Shadow & Chaos Fiend**. Defeating him frees Mei Ling and begins her rescue sequence. She returns to BESUT as a bow defender. Later bosses are optional and are not required for her rescue.

> ### Returning safely
>
> Use the return rift to bank carried expedition loot and return to BESUT. Ordinary unbanked loot is lost on defeat; discovered landmarks, checkpoints and earned pet bonds remain.

The sea journey

Board the ship from BESUT when the route is available. The turtle journey contains **two 45-second levels**, followed by Kraken Island. Use the **sea joystick** to steer in four directions.

Item or hazard	What to do
Rubbish	Move close and tap **Pick Up**. Each collected piece pays one Gold. Each missed piece costs one life, including rubbish left at route end.
Fish	Swim close. The turtle eats automatically and restores 35 fullness, up to 100.
Pink hearts	Move close to collect automatically. Each restores one life, up to three.
Bombs	Avoid contact in both sea levels.
Sharks	Avoid their attacks in level 2.

Lives and fullness are separate

You begin with **three lives**. Fish restore fullness, while hearts restore lives. Below 50% fullness the turtle slows down; at 0% the run ends. Keep feeding even when all three lives remain.

Kraken Island

Completing level 2 takes Adam directly to the fortress. Entering the arena engages **Vorath, the Kraken King**, and ten crab guards. Move away from the Kraken's marked tentacle attacks and the crabs' raised-claw warnings.

After defeating the Kraken, approach Arjun's prison and tap it to free him. Boss victory alone does not complete the rescue. Arjun returns aboard the ship and becomes a scythe defender in BESUT.

Retry and completion: tap **Ride Again** after a failed sea run. Once Arjun has been freed, outbound sea travel closes for that journey; the rescue ship still completes the return.

Completion, settings and help

Completing the story

After both friends have been rescued and returned safely, meet Arjun and Mei Ling at the dock. Interact with the invitation or ship and choose **Embark together**. Read the reunion conversation, then select **Set sail** to begin the farewell voyage. **Pause** and **Resume** control the film.

Complete the ending card to save and return to the title screen. **Explore BESUT** offers village play **Before departure**, with the rescued friends available as defenders.

Saving and leaving

Progress saves automatically at key events. To end a session, use **Menu > Return to Title**, which saves the journey. Use **Continue Journey** when returning, or **Explore BESUT** after the ending. A continued realm visit resumes from its safe checkpoint; unfinished fights restart.

Adjusting the experience

Open **Settings** from the title screen or in-game menu. Adjust interface scale, camera zoom, effects quality, motion and audio where available. Enable **Reduce motion** to reduce camera movement. Lower effects quality for a less demanding presentation.

In the game's Settings panel, use **Drag buttons to customize layout** to reposition touch controls. Land and sea controls have separate layouts. Select **Reset controls** if a layout becomes difficult to use.

Common questions

Issue	Recommended action
The portal is missing.	Examine the northern waystone, speak to Pak Rahim, then return with his key.
An interaction does not work.	Move closer, read the action label and close any open dialogue or menu.
The turtle slows or dies.	Collect fish before fullness runs out. Hearts restore lives, not fullness.
The sea route is unavailable.	If Arjun is already rescued, the route has completed for this journey.

For in-game reference, open **Menu > BESUT Field Guide**. This guide describes the game reviewed on 1 November 2026.
